

Custom Project

In order to for us to be able to work on your design you need to provide us a sketch of your ring in four different views. Below is a simple example of what does that mean.

As more descriptive you are that easier it will be for us to create exactly what you want. There may be features we are not able to provide due to the nature of wood, but please feel free to explore possibilities. Your design remains yours at all times. We will not use your ideas or sell them to anyone. We respect your integrity and we want you to be at ease with this project.

You can supply your wood or choose from the variety of wood available on our website under www.natural-wood-rings.com/wood.aspx as long as we have the type you choose in stock. If you provide us your wood for this project please make sure it's at least 2" x 2" x 4" size (each piece 2" x 2" x 4" if multi wood ring).
